

SEE MORE. DECIDE FASTER. MAINTAIN SMARTER.

Rapid CCTV stormwater assessments give you **real-time visibility** of your underground infrastructure—so you can prioritize what matters.

QUICK SETUP

Deploy in minutes and start collecting data.

REAL-TIME VIEW

See live, high-definition video as you go.

INSPECT THE FULL LINE

Navigate the entire system for a complete assessment.

PRIORITIZE WHAT MATTERS

Identify issues and focus on what needs attention first.

ACTIONABLE INSIGHTS.

DETECT ISSUES

Identify blockages, cracks, offsets and structural defects.

DETERMINE NEXT STEPS

Determine if cleaning, repair, or replacement is needed.

PLAN SMARTER

Make data-driven decisions and optimize budgets.

PROTECT ASSETS

Extend the life of your stormwater infrastructure.

**BETTER VISIBILITY. BETTER DECISIONS.
BETTER STORMWATER SYSTEMS.**

Let's talk about your stormwater assets.

Rapid CCTV Stormwater Assessments: Real-Time Visibility for Smarter Maintenance

INSIGHTS • CENTER LINE LOCATING • MAY 28, 2026

See more. Decide faster. Maintain smarter. Rapid CCTV stormwater assessments give you real-time visibility of underground infrastructure so you can prioritize what matters.

You can't budget for what you can't see. A storm drain that looks fine from the surface can have cracks, offsets, blockages, or structural defects that won't show up until the system fails — usually during the worst possible storm.

Rapid CCTV stormwater assessments solve that. Instead of guessing what's happening underground, you get a live, high-definition view of the inside of your pipes and a clear record of what's there.

What Rapid CCTV Gets You

- **Quick setup.** Crews deploy in minutes and start collecting data.
- **Real-time view.** Live, high-definition video as the camera runs the line.
- **Full line inspection.** The full system gets walked, not just a single segment.
- **Actionable insights.** Identify blockages, cracks, offsets, and structural defects on the spot.

The result is a clear answer to the question every stormwater program needs: *what actually needs attention first?*

Better Decisions, Better Budgets

Stormwater budgets get spread across cleaning, repair, and replacement. The hard part is deciding which dollar goes where. CCTV gives you the data to do that:

- **Detect issues** — find blockages, cracks, offsets, and structural defects before they cause failures.
- **Determine next steps** — decide whether a line needs cleaning, repair, or replacement.
- **Plan smarter** — make data-driven decisions and stretch maintenance budgets further.
- **Protect assets** — extend the life of stormwater infrastructure with the right work, at the right time.

Who This Is For

Municipal stormwater programs, public works departments, property management groups, and engineering firms across the Carolinas — anyone responsible for keeping a stormwater system performing.

Talk to Us About Your Stormwater Assets

Center Line Locating is NASSCO certified and runs rapid CCTV stormwater assessments throughout Charlotte and the Southeast. Better visibility. Better decisions. Better stormwater systems. [Request a CCTV inspection](/request-service/cctv-flush) or call 704-315-5820.
